Jan 29 2nd Quarter ends
Feb. 5 Report Cards
Feb 8 MAP Testing Begins
Feb.10 Half Day (B Day)
Feb. 15 No School Presidents' Day
Feb. 24 Half Day (A Day)

ELA: In Reading the students will finish their African American Literature Unit by reading a speech that gives some real solutions to race relations in the United States. They will then dive into some really great short stories focusing on some new genres like: drama, science fiction, and fables. In Language Arts the students are working on the persuasive essay and on units on nouns and verbs.

SOCIAL STUDIES: In Social Studies students are learning a lot. We just got through learning the Preamble, along with some background information as well as its purpose. We are now learning about and discussing current events concerning the Presidency, impeachment, and the chaos on Capitol Hill. We will be moving on to learning the amendments. So have them dust off those Constitution books again! What a great time to be teaching Social Studies! Thanks for your support.

SCIENCE: In Science, students are learning about how global warming has influenced natural disasters and affected animals. This unit leads into population and resources. My office hours are 2:00-2:45, Monday-Friday, and I would love to talk to any of my parents or guardians with any questions or concerns. Please send me an email at kpeterston@sd88.org to set up a meeting.

Math:

In Math, students have been and will continue to learn how to Generate Equivalent Expressions using the different properties of operations. Students have been learning how to create expressions from real-world situations so they can solve problems. Next, your scholars learn how to solve problems using equations and inequalities. Volume 2 math books can be picked up from the school Tuesday, Thursday, and Friday 9-11am and 1-3pm. Thank you for your support.

PE/Health: Students continue to exercise virtually in PE We are mixing things up a little by using dance and yoga videos to keep students engaged. Health classes are learning about the importance of exercise.

In STEM, students are studying mean, mode, median, and range.

French
Our RMS scholars have done an amazing job on their French Speaking Country Projects. They are now exploring T'es branché, grammar, vocabulary and grammar videos.

EVERY STUDENT MATTERS - EVERY MOMENT COUNTS
