Nov. 25-27- No School

ELA: We are focusing on writing this month! In reading we are working on writing a spectacular summary. The summaries will contain all the fantastic things we have learned about plot and story structure. We also will write a personal narrative in language arts class. The narrative will focus on sensory details as well as dialogue. Write On!

SOCIAL STUDIES: We have been VERY busy in SS class. We have been learning about and discussing the topic of Activism. We gained a lot of insight as to why activists are needed as we took an indepth look at the conditions in sweatshops and their locations. We made the lessons personal by having the students look at various clothing labels in their closets to see the countries from which those items were imported. Then in class locate those countries on a map. We are now turning our attention to voting as the Presidential Election nears. We plan on having a Mock Election to simulate a real election. Stay tuned for the results!!

SCIENCE: Wow! Mrs. Peterson is excited about Science, The students are studying their Amplify unit on Geology on Mars! Students are learning all about Mars, geology, the solar system, and beyond. Students are working on their astronomy projects that are due November 2. My office hours are 2:00-2:45, Monday-Friday, and I would love to talk to any of my parents or guardians with any questions or concerns. Please send me an email at kpeterson@sd88.org to set up a meeting.

MATH: Greetings from Mr. Lega and Mrs. Tucker-Smith! We are wrapping up rational number operations dividing rational numbers. The plan is to take topic 1 assessment Nov.5. Also, we will continue to utilize Imagine Math to build and strengthen their foundations so they can flourish. If you have not already, make sure to join your mathematicians Google Classroom so you can stay current with assignments. Our office hours are 2:00-2:45, Monday-Friday and we can be reached at clega@sd88.org and vsmith@sd88.org.

Welcome Back!
New adventures are in front of us this school year. 7th and 8th grade students if you have library books from last year put them in a safe place so you can bring them back. Have a Great School year and remember to Read, Read, Read.
Mrs. HutsonLibrarian

SPECIALS: STEM students are currently learning to calculate both speed and velocity in one dimension. They are also excitedly developing dynamically generated video game content using fundamental coding principles.

Bienvenue dans le classe de français de Mme Kejera/Welcome to Mrs. Kejera's French class. Students are sharing things they like and things they don't like in French. The objective for this month is for students to be able to discuss la rentrée, teens in France and French Speaking Countries. It is a joy to see and hear the students express their likes and dislikes and also for students to be able to invite someone and accept or refuse an invitation in French. It is really a joy. C'est vraiment un plaisir.

PE/Health: PE class has kicked off the year by doing their daily exercises virtually. Participation has been great! Health classes have started their Food and Nutrition unit

EVERY STUDENT MATTERS - EVERY MOMENT COUNTS
